Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _3_MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Estatemions of time may be available under the provision of 37 CFR 1.13(a). In no event, however, may a reply be timely field after \$13.(6) MONTHS from the mailing date of the scenario-discovery of			Examin r		Art Unit				
Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _3_MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Ederations of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed decreased in the major of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed decreased in the provision of the major with the state of the provision of the major with the state of the provision o						_			
THE MAILING DATE OF THIS COMMUNICATION. Estandarios of time may be available under the provisions of 37 CPR 1.13(a). In no event, however, may a risply be timely filed after SIx (in MoNTIS from the mailing date of this communication. If the period for risply specified date on the set than the risk (20 disps, in the statutory minimum of thisty (20) disps will be considered timely. If the period for risply specified date on the set of the communication. Failure to risply within the set or extended period for risply will, by statute, cause the splication to become ABANDONED (33 U.S.C. § 133). Any resplic received by the Office later than throw amonts after the mailing date of this communication, even if timely filled, may reduce any amont patient term adjustment. Set ST CPR 1.70(b). Status 1) Responsive to communication(s) filled on <u>07 October 2003</u> . 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 10-13.15-27 and 29-32 is/are pending in the application. 4a) Of the above claim(s) <u>27.31 and 32</u> is/are withdrawn from consideration. 5) Claim(s) 10-13.15-26.29 and 30 is/are rejected. 7) Claim(s) 10-13.15-26.29 and 30 is/are rejected. 7) Claim(s) is/are ablyceted to. Application Papers 9) The specification is objected to by the Examiner. Application Papers 9) The provision of declaration is objected to by the Examiner. 10) The drawing(s) filled on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CPR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CPR 1.0(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority		of this communication app	ears on the	cover sheet with the c	orrespondence address				
2a) This action is FINAL. 2b) ☐ This action is non-final. 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) ☐ Claim(s) 10-13.15-27 and 29-32 is/are pending in the application. 4a) ☐ the above claim(s) 27.31 and 32 is/are withdrawn from consideration. 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) is/are subject to restriction and/or election requirement. Application Papers 9) ☐ The specification is objected to by the Examiner. 10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 and 120 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) ☒ All b) ☐ Some * c) ☐ None of: 1. ☒ Certified copies of the priority documents have been received. 2. ☐ Certified copies of the priority documents have been received in Application No. 3. ☐ Copies of the certified copies of the priority documents have been received in Application No. 3. ☐ Copies of the certified copies of the priority documents have been received in Application No. 3. ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78. DETAILED ACTION

- 1. The amendment filed 10/7/03 has been entered. Claims 14 and 28 have been canceled. Claims 10-13, 15-27, and 29-32 are pending in the application. Claims 27 and 31-32 have been withdrawn.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

3. Claims 10-13, 15-26, and 29-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luch (USPN 4,101,385) in view of Luch (USPN 3,865,699) or Luch (USPN 4,009,093) and in further view of the admitted prior art or Midoguhchi et al (USPN 5,483,012) or Horibe et al (6,231,984).

Luch teaches a process for making a metal plastic structure for use in automobiles such as for use as automobile bumpers utilizing a highly advantageous platable plastic composition comprising in percent by weight about 62% polymer, about 33% carbon black (an inherently conductive substance), about 0.7% elemental sulfur, about 0.7% mercaptobenzothiazyl disulfide and about 3% zinc oxide (inherently conductive) or other platable plastic composition known in the art, that is melt blended, then sheeted to form sheets having thicknesses in the range of about 100 to 2000 microns, and the thus formed platable plastic sheet is then mechanically applied under heat and pressure with or without a cement (adhesive) to a roughened, formed aluminum or aluminum alloy surface in such a fashion that the resultant aluminum-platable plastic is mechanically locked together (as in instant claims 10-11, 13,15,21-26), Abstract; Col. 1, lines 5-42; Col. 1, line 64-Col. 2, line 9.) Luch also teaches that the platable (conductive) plastic surface

Art Unit: 1773

is then plated with "electrodeposited paint" wherein the platable article acts as a cathode in a plating bath such as in a nickel plating bath in such fashion that voltage is gradually increased until the whole plastic surface is covered with electrodeposited nickel that may further be covered by an electrodeposited layer of chromium or copper or nickel alloys wherein Luch specifically teach an example with a nickel electrodeposited layer of 3 microns followed by a copper electrodeposited layer of about 10 microns and further teaches that the platable composite can be plated according to known methods (as in instant claims 15, 17 and 19-20; Col. 1, lines 45-48; Col. 2, lines 10-23; Example.)

Luch does not specifically teach that the platable plastic film has a thickness in the range of 1 to 100µm or 3 to 75µm, or that the electrodeposited paint film has a thickness of about 10 to about 40µm or about 10 to about 20µm, however given that thickness is a known result-effective variable affecting the mechanical properties of the resulting composite, it would have been obvious to one having ordinary skill in the art to utilize routine experimentation to determine the optimum thickness of the plastic film as well as the protective plating layer to provide the desired mechanical properties of the composite material taught by Luch for a particular end use.

With regards to the volume specific resistance, though Luch '385 does not specifically teach the volume specific resistance or the surface resistance of the platable plastic compositions, it is well known in the art that conductivity or electrical resistance, measured as volume specific or surface resistance, are known result-effective variables in terms of an electrodeposition process as taught by Luch'385 wherein Luch '699 (Col. 2, lines 22-35; Col. 4, line 16-Col. 5, line 13) and Luch '093 (Col. 2, lines 23-36; Col. 4, line 14-Col. 5, line 11) teach that the plastic composition preferably has a volume resistivity of less than 1000 ohm-cm in order to provide the

Art Unit: 1773

desired electrical properties for electroplating wherein the plated object may be subjected to further electrodeposition in ways well known to those skilled in the art. Hence, it would have been obvious to one having ordinary skill in the art at the time of the invention to provide a platable plastic composition having a volume specific resistivity of less than 1000 or 10³ as taught by Luch '699 or Luch '093 for the invention taught by Luch '385 or to utilize routine experimentation to determine the optimum conductivity or resistivity as measured as volume specific resistance and/or surface resistance, to provide the desired electrical properties for the electrodeposition process taught by Luch '385.

With respect to the electrodeposition paint, though Luch teaches that the platable plastic-metal composite is further coated with an electrodeposited decorative plating layer, Luch does not teach utilizing the electrodeposition paint as instantly claimed. However, the admitted prior art at Page 9, line 18-Page 10, line 12, teach that electrodeposition paints as in claim 18 are known in the art wherein Midogohchi et al, cited at Page 9, line 23 of the instant disclosure, specifically teach the use of a cationic electrodepositable coating composition as instantly claimed to provide improved chip resistance and corrosion resistance to steel automotive panels wherein the thickness of the cationic electrodepositable coating composition is not specifically limited and is in the range of 10 to 50μm, preferably 15 to 35μm (Abstract; Col. 2, lines 47-53; Col. 4, lines 18-28; Col. 7, lines 9-54; Col. 8, lines 1-4.) Horibe et al also teach the use of a cationic electrodeposited coating film as instantly claimed as a corrosion resistant component of a multilayer coating film on an automotive part or body such as a fender wherein the coating layer thickness is preferably 10-40μm, particularly 15-30μm (Abstract; Col. 1, line 66-Col. 3, line 63.) Hence, it would have been obvious to one having ordinary skill in the art at the time of

Art Unit: 1773

the invention to utilize any cationic electrodepositable coating composition conventionally utilized for coating automotive parts wherein a cationic electrodeposited paint containing a base resin having a hydroxyl group and an amino group which can be converted to a cation with an aliphatic block polyisocyanate compound is taught by Midogohchi et al or Horibe et al to provide improved chip resistance and/or corrosion resistance to the metal automotive substrate taught by Luch '385 in view of Luch '699 or Luch'093.

Response to Arguments

- 4. Applicant's arguments with respect to claims 10-13, 15-26 and 29-30 have been considered but are moot in view of the new ground(s) of rejection.
- 5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
